Subject: Application for Entry Level Software Engineer

Dear Hiring Manager,

I am writing to express my interest in the Entry Level Software Engineer position at Medpace. I have recently completed my Master of Computer Applications (MCA) with a specialization in Artificial Intelligence and Machine Learning and have developed a strong foundation in software development, object-oriented programming, and database management.

During my academic experience, I have built end-to-end applications using Python, Django, and SQL, following software development life cycle practices including requirement analysis, design, development, testing, and optimization. I developed an AI-powered vehicle damage detection system and a large-scale data-driven platform handling over 50,000 entities, where I focused on backend development, API design, and performance optimization.

I have a solid understanding of object-oriented programming concepts and relational databases, along with experience using Git for version control. I am particularly interested in working on application development and modernization, and I am eager to expand my skills in technologies such as C#, web services, and cloud-based platforms.

I am detail-oriented, adaptable, and highly motivated to contribute to a collaborative development environment. I am excited about the opportunity to be part of Medpace and contribute to building reliable and impactful software solutions.

Thank you for your time and consideration. I would welcome the opportunity to discuss my application further.

Sincerely,
Vinay Beesaboina
